5th SCI: KAS

Objective (y-axis)

- KS.5.2.4 — Predict how biotic and abiotic factors in an ecosystem can affect one another.
- KS.5.2.3 — Analyze how organisms interact to form food chains and food webs.
- KS.5.2.2 — Classify living things based on their role within an ecosystem.
- KS.5.2.1 — Compare the basic needs and characteristics of animals and plants.

Objective key (KIPP Chicago Objective):

- KS.5.2.1 — Compare the basic needs and characteristics of animals and plants.
- KS.5.2.2 — Classify living things based on their role within an ecosystem.
- KS.5.2.3 — Analyze how organisms interact to form food chains and food webs.
- KS.5.2.4 — Predict how biotic and abiotic factors in an ecosystem can affect one another.

KIPP Chicago Objective

Objective key:
- (KS.5.2.1) Compare the basic needs and characteristics of animals and plants.
- (KS.5.2.2) Classify living things based on their role within an ecosystem.
- (KS.5.2.3) Analyze how organisms interact to form food chains and food webs.
- (KS.5.2.4) Predict how biotic and abiotic factors in an ecosystem can affect one another.
